⚡ Overview

Jade is power personified — a force of nature that's cut through the CFW women's division with unshakable confidence and raw physicality. Her presence alone commands attention: a towering athlete forged by discipline, not theatrics.

There's no mysticism, no flash. Just a fighter who looks like she could break the ring before breaking a sweat.

After an explosive debut run — defeating both **Lola Rose** and **Marisol Vela** in decisive fashion — Jade has become the early measuring stick of the division. Her size, strength, and precision make her an immediate main roster standout. So far, no one has found the key to overcoming her power.

Despite the intensity of her look, Jade isn't a caricature — she's real, methodical, and brutally focused. She brings a primal edge to the ring, fighting like someone who's seen the world's rough edges and learned to thrive there. Every move has intent; every victory is earned.

In-Ring Style

Dominant power wrestling grounded in control and impact. She doesn't rush — she stalks, overwhelms, and finishes. Her pacing and composure make her dangerous even before she strikes.

Finishing Move

Emerald Driver — A devastating lift-and-drop slam that showcases her strength and precision. She hits it clean, centered, and deliberate — the kind of move that ends matches cold.
